

CINPLE CONC

Generic Reconciliations System

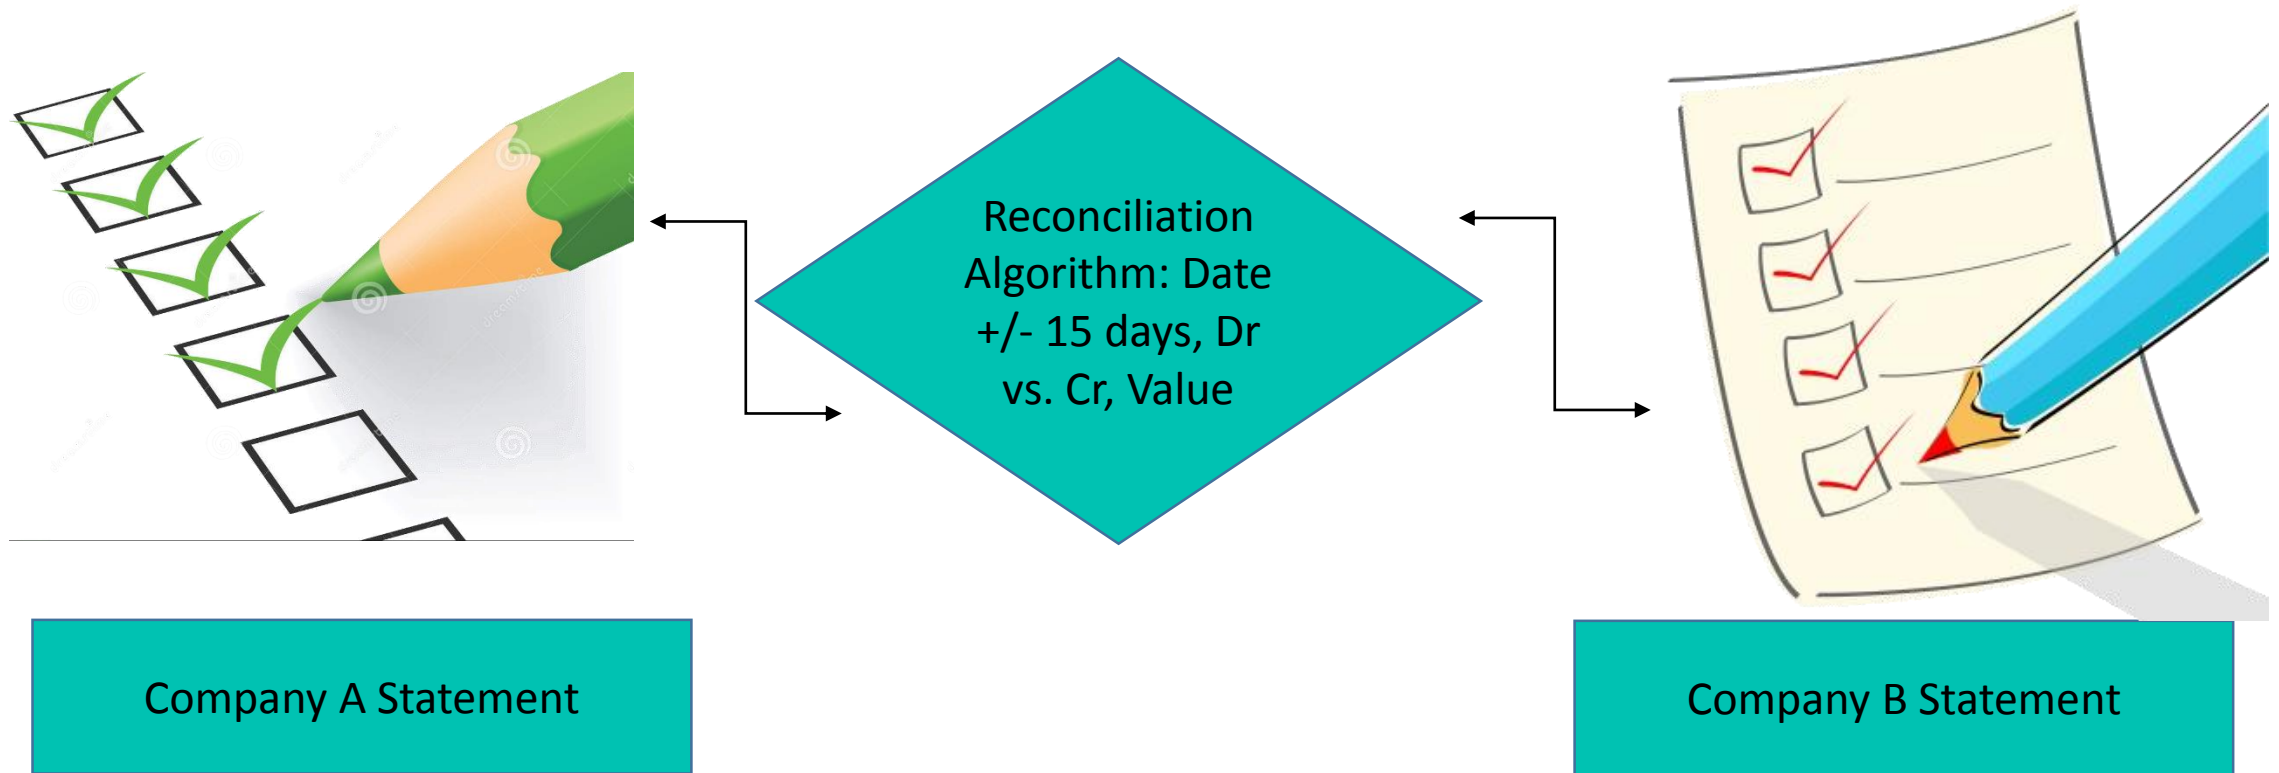

CinpleConc is an unique software application that can be tailored to each client's specific needs.
It reconciles between any two different lists into a common format by using configurable algorithms.
It can be used in any business environment where there is a need to do any type of list reconciliation.

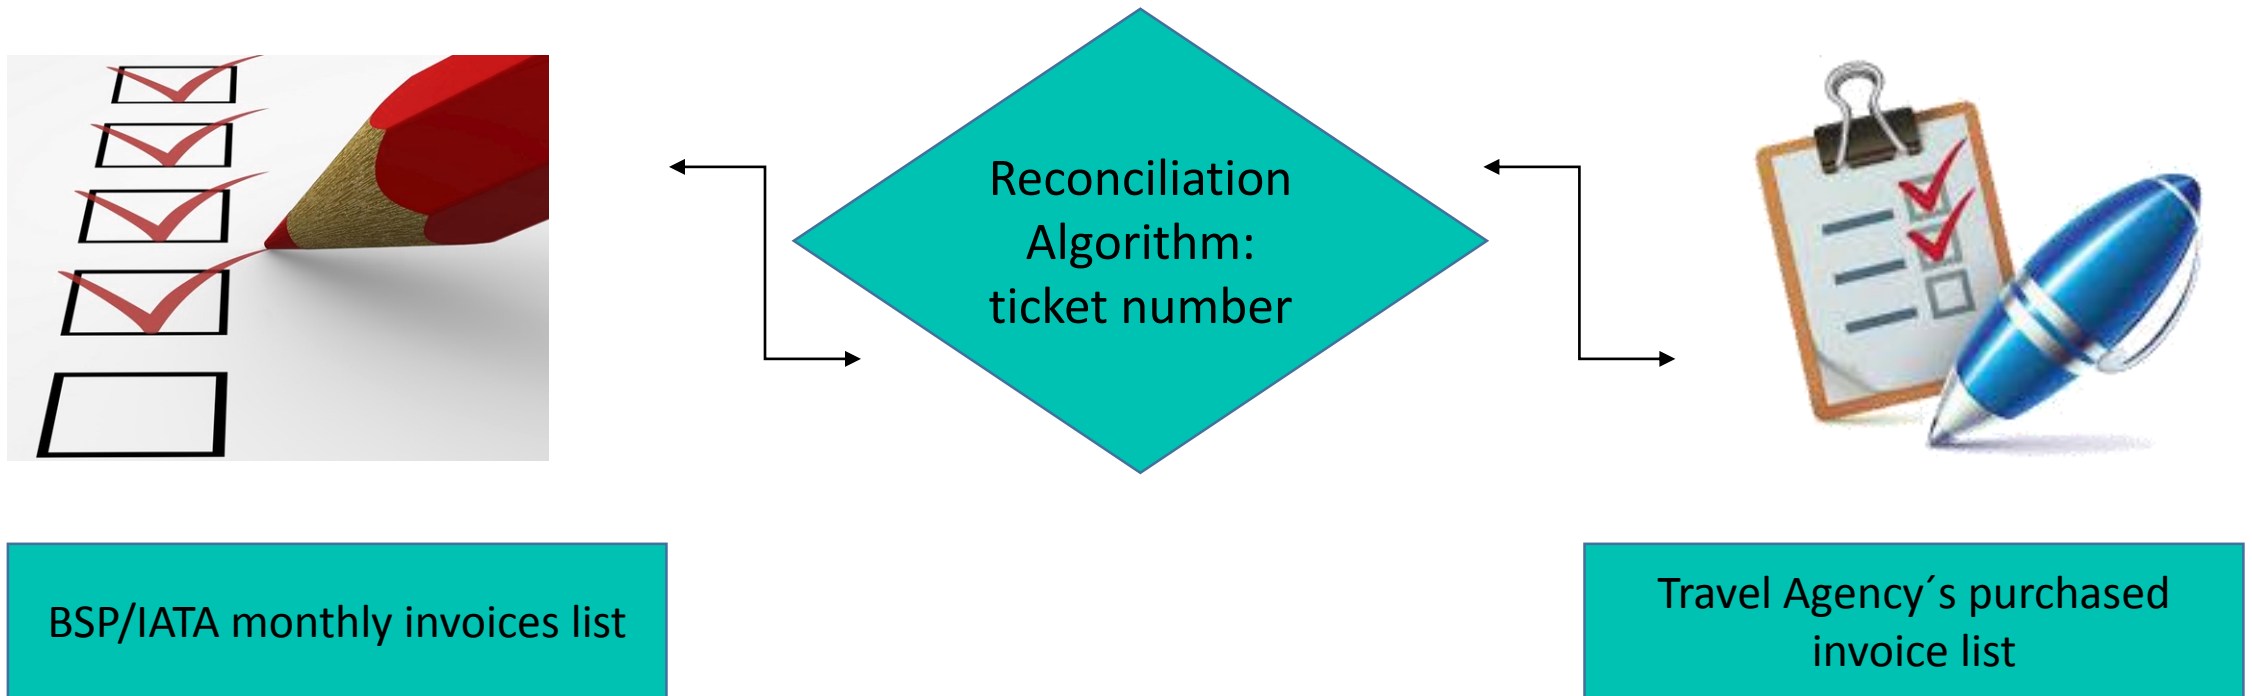

Some examples where CinpleConc can be used:

Example 1 – reconcile two companies current accounts statements

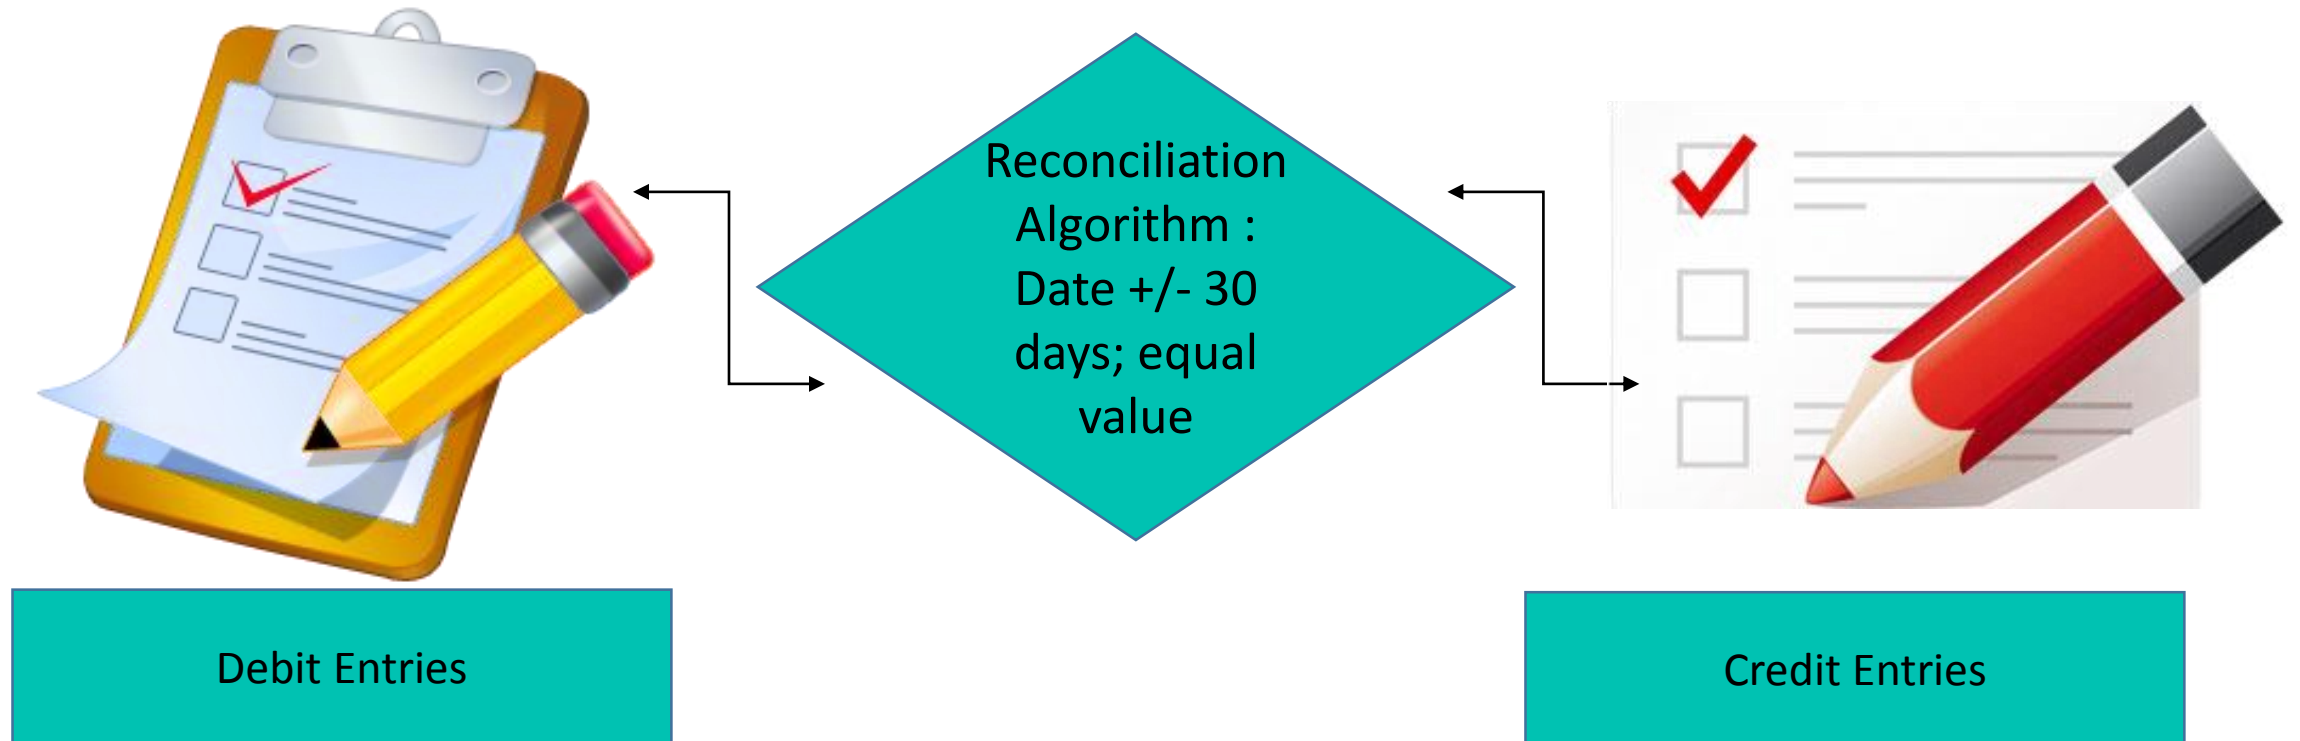

Result: reconciliation between two statements.

Example 2 – Flight ticket conference at a travel agency:

Result: verification that all tickets purchased were billed.

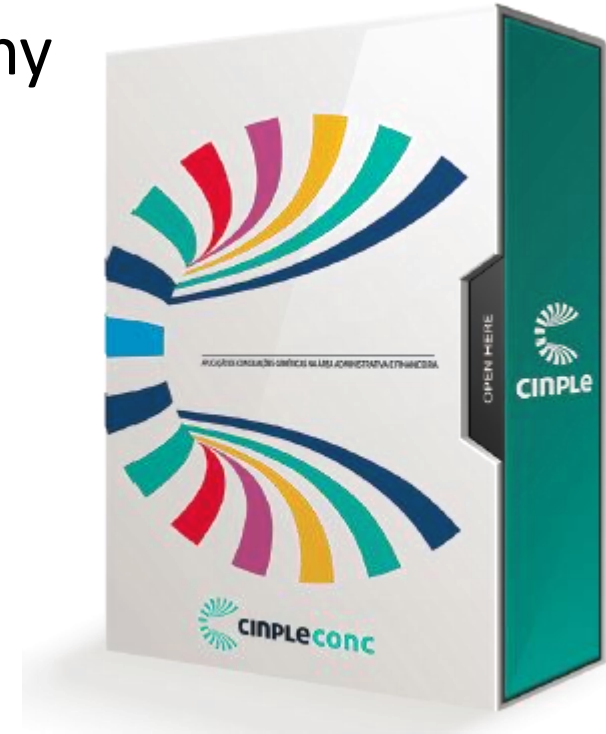

Example 3 - Internal reconciliation of an account from a current account statement:

Result: list of unreconciled movements.

- ✓ Can be used in any business where it is necessary to do any type of list reconciliation;
- ✓ Customizable list formats according to each user needs (normally Excel);
- ✓ Choose the algorithm needed for each reconciliation;
- ✓ Manual reconciliations can be used to complement the automatic reconciliation;
- ✓ Do queries by value, date, movements entries and more;
- ✓ Secure solution kept in an SQL database.
