

Enterprise Resource Planning

Cinple Gest is a management software with a modular architecture that covers the main business flows of medium and small businesses. Its main goal, which sets it apart from other solutions, is to maintain a business's information integrity by enabling simple and accurate transmission and sharing of data between the different operating areas.

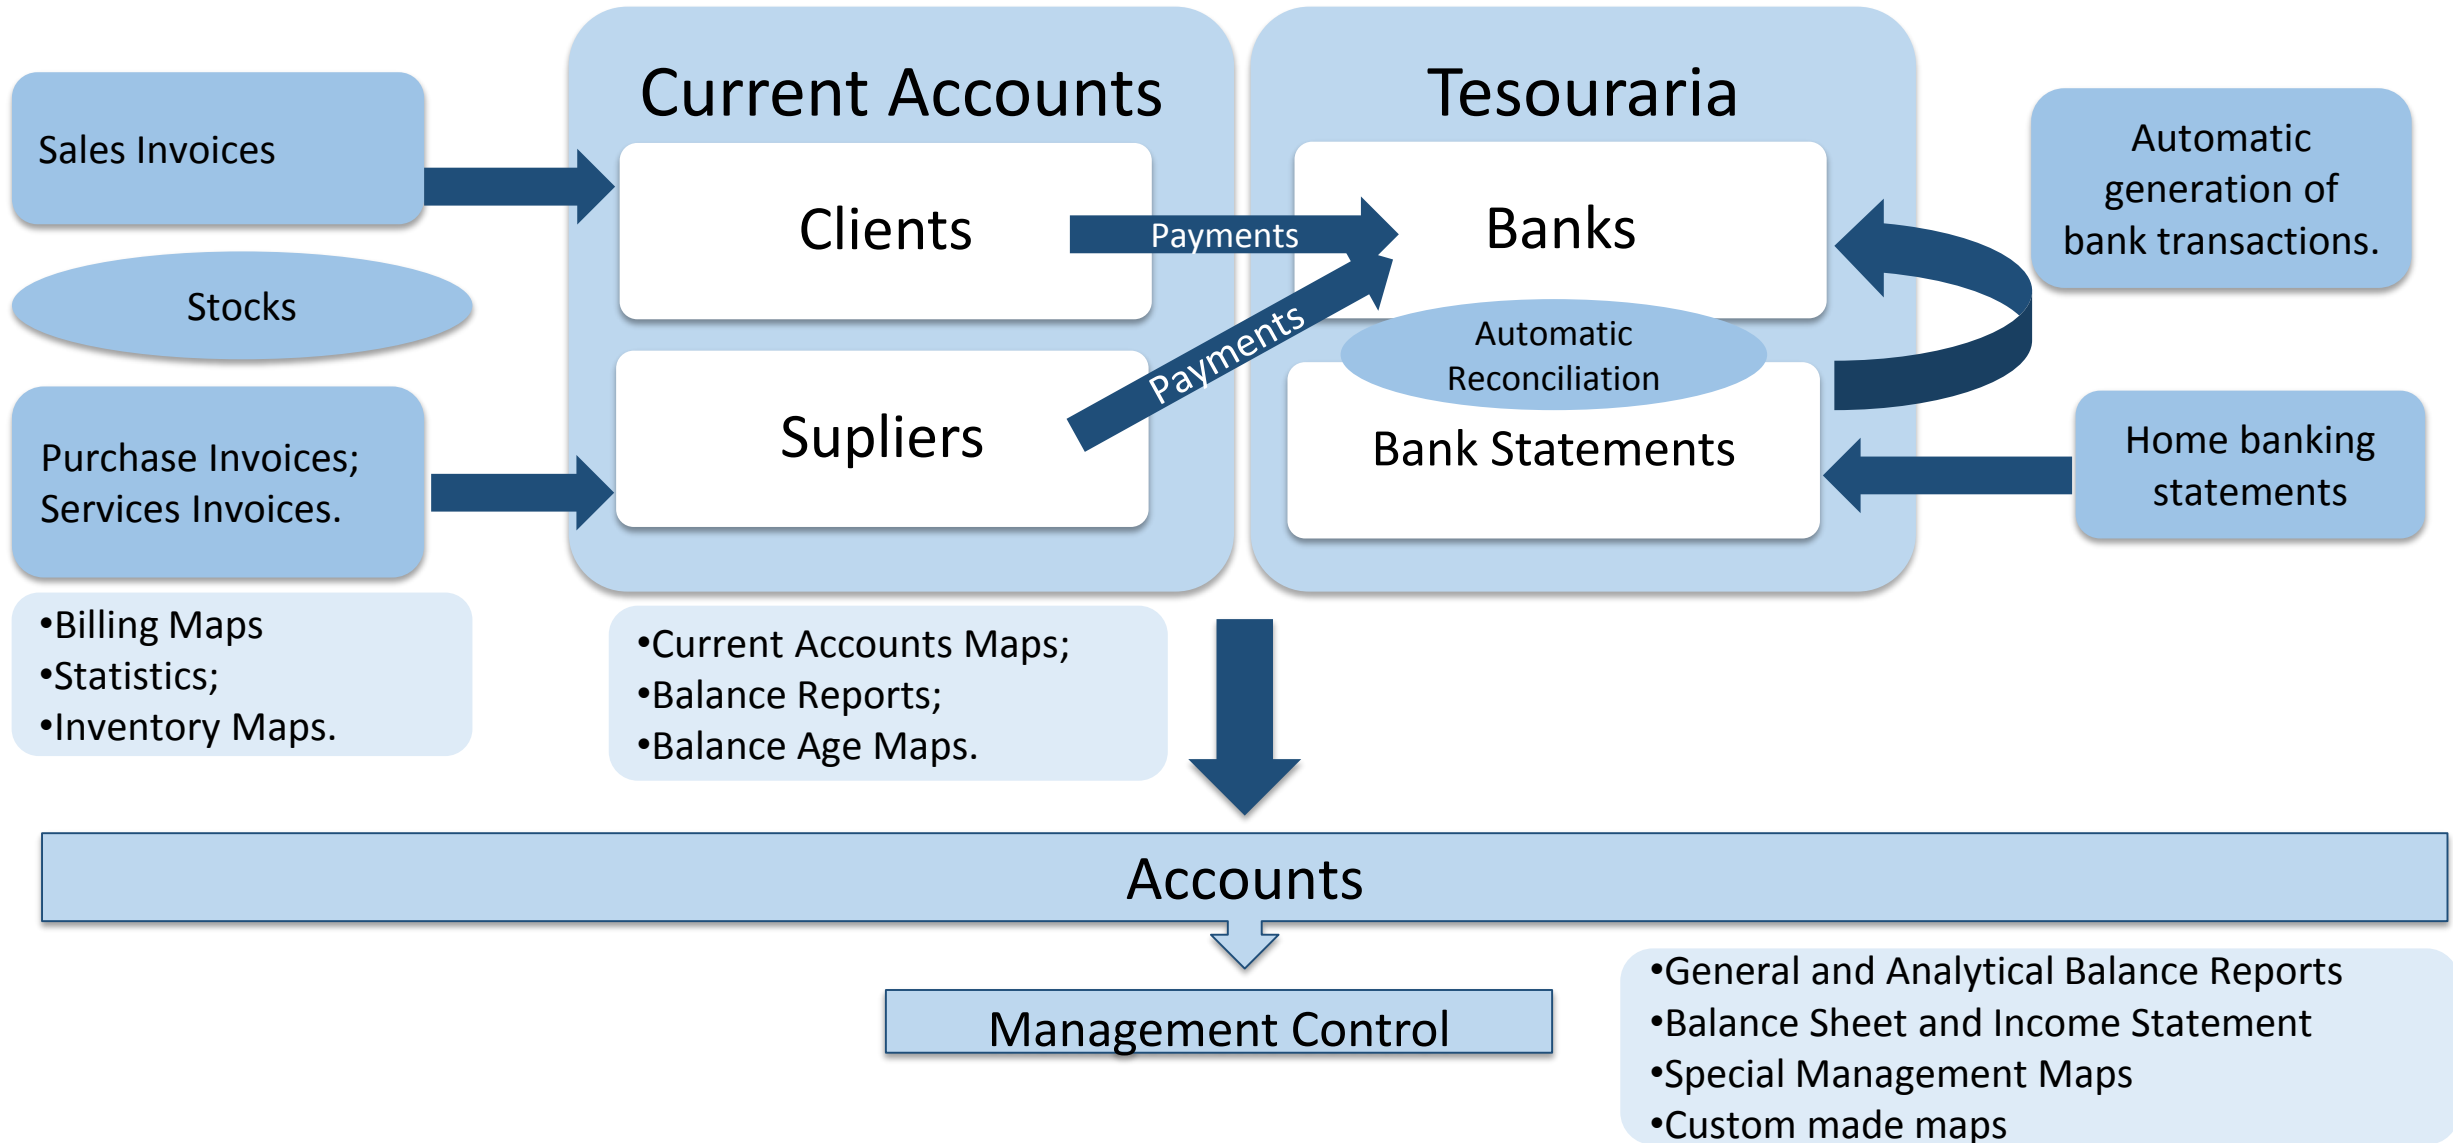

The system seeks to address the company as a whole with each module corresponding to a specific area:

- Billing Control
- Inventory
- Production
- Checking Accounts
- Invoicing
- Treasury Control
- General and Cost Accounting

Certified Program 372 AT

- ✓ Easy configuration and rapid implementation;
- ✓ Works out of the box due to the extreme ease in configuring and installing the software;
- ✓ Intuitive and simple to use with low operating costs;
- ✓ The integration with third-party billing software for specific business segments that plug into the upstream Cinple suite's modules.
- ✓ Imports the bank statements from banks net pages, in any format, featuring an unique methodology that generates the accounting movements from there, automatic bank reconciliation, and improving significantly the quality of information on time.
